

GOODRICH

Road Map of Northern California

*Follows You
Everywhere*

Goodrich Service Stations operate in over one hundred cities and towns.

They are equipped to supply Goodrich Tires, Tubes and Repair Materials—the best and most dependable manufactured.

The kind that take the terrific jolts of road and come up smiling—these are GOODRICH DE LUXE Truck Tires. Made of the best rubber nature can produce—with specially-toughened treads—shaped so as to eliminate chipping—moulded so as to wear down evenly and slowly. Hundreds of GOODRICH Truck Tire Distributors sell and apply them.

GOODRICH DELUXE TRUCK TIRES

A road map of the Motorist's Paradise would trace pretty closely the network of road lines that surround the High Sierras. It would appropriate a generous portion of the map of California. Here is scenic beauty in heroic type with every variety and vagary of it. Here are the finest automobile roads in the land, and a mileage of them that runs into many figures.

To live in this Paradise is one thing; to enjoy it is another. The motorist of California who does not spend his vacation in his car is overlooking his Paradise.

His is not a question of inducement. The wealth of scenic wonder and beauty lying before him in whatever direction he turns does not need discovery. The lure and the wonder of it, each motorist knows if only from a long distance view. The charm of it, he may have shut from his soul. The magnificence of it, he understands though he may have schooled himself to the grip of it. Its scenic grandeur is broadcast. Every section of the country has its own individuality, and its wealth of it.

Our motorist's task is selection, yet not a hard task. All he needs to do is go. Each section offers easy access. With a Goodrich road map and an intelligent eye for Goodrich Guide Posts, the motorist can go care-free, and not come to grief.

Object points upon which to base a tour, our motorist has a thousand. He can cut a vacation trip as wide and long as he chooses, and never retrace a mile. He may seek and find sanctuaries of rest, set in refuges of tranquil grandeur amidst craggy, snow-clad peaks at once restful and thrilling. The cyclorama of mountain and forest is boundless.

Goodrich Dealer Touring Stations are on every route, in every town and city, where maps and late information in reference to roads may be obtained gratis.

SEE CALIFORNIA NOW

No greater national necessity exists than the need of improved transportation facilities. To get foodstuffs to market, to relieve congested railroad terminals and to get manufactured products from factories to the jobber and to the consumer are immediate necessities that are imperative to the success of the nation. Road building is an economic factor in the life of our nation. It is an urgent necessity now to stimulate business for farm and city.

It would be just as vital an error to stop the improvements to the railroads, the building of cars and locomotives and the improvements of terminal facilities as it would be to stop the improvement of the great arteries of travel from the farm to the station or the manufacturing center to the tributary distributing points.

All our plans should be on a permanent basis. Makeshifts and temporizing should be abandoned at the very start.

As one of the foundation activities of the business life of the country it should be vigorously pushed. Road improvement programs in county and state should be greatly enlarged and preparation made for their completion. The improvement of roads should be made in view of their importance as traffic agencies to the nation and state as well as to the counties. The need of their improvement "for America's sake" and "for America's immediate needs" should be the dominant idea in the mind of every official having in charge this work. Make the job fit the greatest need.

The conditions affecting road improvement are unprecedented and are increasing from day to day. The public officials of this state will rise to the level of present events and measure up to the standard of excellence the public requires of them. Let road building and road maintenance go forward upon a larger scale than ever before, with every effort a fitting monument to the zeal, patriotism and efficiency of our highway officials.

NOTE—There are Goodrich Branches in every large city and Goodrich Dealers everywhere who will supply you with Goodrich Maps and local touring information, or you can communicate direct with Goodrich National Touring Bureau, Akron, Ohio.
